INTRODUCTION

Breezeway Series Wall Mounted Propeller Fans

The Breezeway propeller fan line provides a variety of solutions to address the needs of wall mounted exhaust and ventilation applications such as garages, factories, warehouses, and other relatively clean air applications.

Whether steel or cast aluminum, all propellers in the Breezeway product line are statically and dynamically balanced to AMCA Standard 204-96, Balance Quality and Vibration Levels for Fans, to ensure quiet and reliable operation.

Breezeway fans offer one of the broadest motor selections in the industry. All fans are fully assembled and factory tested prior to shipping; belt drive models are pre-set to the specified RPM.

INTRODUCTION

BREEZEWAY DIRECT DRIVE SERIES

P-Series

- Static pressure up to 0.625 in. wg.
- Flow capacity up to 6,562 CFM.
- Exhaust or supply in light-duty applications.
- Stamped aluminum propeller with steel hub, zinc-coated wire guard/power assembly mounted on RIS vibration isolators attached to a steel venturi panel.
- Available sizes from 10" to 24".

Breezex (BX)

- Static pressure up to 0.375 in. wg.
- Flow capacity up to 4,720 CFM.
- Exhaust or supply in light-duty applications.
- Field reversible fan.
- Stamped aluminum propeller with steel hub, a fabricated power assembly and steel venturi panel.
- Base-mounted TE type motors.
- Explosion proof motors with less reversing switch.
- Available sizes from 10" to 24"

BC-Series

- Static pressure up to 0.75 in. wg.
- Flow capacity up to 43,437 CFM.
- Exhaust or supply in light-duty applications.
- Available sizes from 24" to 54".

BREEZEWAY BELT DRIVE SERIES

BLL-Series

- Static pressure up to 0.5 in. wg.
- Flow capacity up to 13,774 CFM.
- Exhaust in light-duty applications.
- Fabricated steel propeller, fabricated steel power assembly, and a steel venturi panel.
- Available sizes in 24" to 36".

BHM-Series

- Static pressure up to 0.5 in. wg.
- Flow capacity up to 34,446 CFM.
- Exhaust or supply in medium-duty applications.
- High-efficiency fabricated steel propeller, galvanized power assembly, and a fully developed venturi, integrally spun into a galvanized panel.
- Available size from 24" to 48".

BHH-Series

- Static pressure up to 1.0 in. wg.
- Flow capacity up to 58,413 CFM.
- Exhaust or supply in heavy-duty applications.
- High-efficiency fabricated steel propeller, a robust galvanized power assembly that can handle high horsepower motors, and a fully developed venturi integrally spun into a galvanized panel.
- Available sizes from 24" to 60".

BCH-Series

- Static pressure up to 1.0 in. wg.
- Flow capacity up to 68,172 CFM.
- Exhaust or supply in heavy-duty applications.
- High-efficiency cast aluminum airfoil propeller, a fabricated steel power assembly and a heavy gauge venturi panel.
- Available sizes from 24" to 60".

CERTIFICATIONS & LISTINGS

Breezeway Direct & Belt Drive Fans

PennBarry certifies that the Breezeway direct drive and belt drive models shown on pages 7 and 12-46 are licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA publication 211 and AMCA publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

cULus Certification

Breezeway fans (models P, BLL, BHM, BHH and BCH) carry the UL label, UL705 (ZACT/ ZACT7), file #E28413.

MOTOR AVAILABILITY

BC Direct Drive Motor Availability

The following chart lists the various motor options available for each of the direct drive fan models. Once a fan model is selected, this chart can be used to determine if a suitable motor is available. (If not, another selection may have to be made from the fan performance charts). Look under the nominal RPM heading to determine which fans have 2-speed and 3-speed motors. None of the BC motors come standard with more than one speed.

(1) Hp shown is for TE, ODP Hp is 1/4.

Performance certified is for installation Type A: Free Inlet, Free Outlet. Speed (RPM) shown is nominal. Performance is based on actual speed of test. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for Installation Type A: free inlet hemispherical sone levels. Performance ratings include the effect of rear guard in the airstream. For models shown on this page, the AMCA Certified Ratings Seal applies to air and sound.

P-SERIES | DIRECT DRIVE

P-Series Fan Curves

The fan curves illustrated below show the range of capacities available for P-Series direct drive units. Each graph shows the performance of several models at one particular nominal speed. Fan curves provide a quick method for selecting a fan unit based on design point requirements.

The direct drive performance charts provide the tabular data (CFM and static pressure) used to plot the fan curves. In addition, horsepower, tip speed and sones are tabulated. Since sound is normally an important factor in the selection of a fan, an engineer will usually want to select the "slowest" unit which meets CFM and SP requirements. Please refer to the Motor Selection section to make sure the motor you select meets your electrical requirements.

1050/1140 RPM

1300 RPM

1550 RPM

1650 RPM

Note: Breezeway fans are only one component of a total system. As such, fan performance is directly affected by the system. It is critical that system designers determine the actual system loss to ensure that the actual flow is specified in the system design.

BELT DRIVE PERFORMANCE DATA

Performance Data

The belt drive models shown on the following pages have sizes and capacities ranging from below 300 CFM to above 67,200 CFM, with static pressures from 0" to above 1". All models are available with a wide range of horsepower sizes and RPM's.

The data provided for each belt drive model includes:

- Fan Curve Graph
- Performance Chart

Each curve graphically displays the range of capacities available for each model, in most cases beyond the specifics shown in the tabular data. The maximum performance afforded by each horsepower is indicated by dashed lines and the RPM is indicated by solid lines.

Some models have graphs that show both shaded and unshaded areas. Selection should be made from the unshaded area only.

The highest RPM shown for a specific horsepower in the tabular data is the maximum speed that for any point along the performance curve, the BHP will not exceed the available horsepower.

It is important to note that, while it is common industry-wide practice to exceed a "nominal" horsepower by using a motor's service factor, PennBarry uses a conservative portion of the service factor, allowing half to remain a true "safety" factor.

Note: Breezeway fans are only one component of a total system. As such, performance is directly affected by the system. It is critical that system designers determine actual system losses to ensure that the actual flow is specified in the system design

Belt Drive Losses

The AMCA Review Committee has developed the chart shown below for the purpose of estimating belt drive losses. To calculate total BHP (including drive losses): Find the BHP of your operating point on the x-axis on the graph below. Follow the vertical line to the curves indicating the range of drive losses. Look at the y-axis on the left and find the drive loss percentage. Calculate the total BHP by adding the drive loss to the operating point BHP. For BHP's below 0.3, use 30%.

Drive Loss Reference Chart

For totally enclosed, explosion proof, multi-speed and all 1.0 Service Factor motors, fan BHP plus drive losses should not exceed motor rated HP.

Graph reprinted from AMCA publication 203, with the express written permission from the Air Movement and Control Association, Inc., 30 West University Drive, Arlington Heights, IL 60004-1983.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sonas at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sonos at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

Performance certified is for installation type A: free inlet, free outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for installation Type A: Free inlet hemispherical sone levels. Performance ratings do not include the effects of appurtenances.

PENNBARRY PRODUCT SOLUTIONS

Commercial

- Roof & wall exhaust centrifugal fans
- Ceiling, wall, & inline centrifugal fans
- Roof supply centrifugal fans
- Square & round centrifugal fans
- Wall mounted axial fans
- Hooded roof axial fans
- Upblast roof axial fans
- Gravity ventilators
- Roof curbs

Industrial

- Freestanding centrifugal fans
- Industrial & material handling fans
- Tubular centrifugal inline fans
- Mixed flow centrifugal fans
- Plug & plenum fans
- Wall mounted propeller fans
- Tube axial fans
- Vane axial fans
- Bifurcator fans
- Lab exhaust

Kitchen ventilation

- Make-up air units
- Exhaust fans

Energy recovery

- Outdoor units
- Indoor units
