

### Application

Model SEDFD-210 is a dynamic rated multi-blade fire damper with 3V style blades. The SEDFD-210 is qualified up to 4,000 fpm (20.3 m/s) and 10 in. wg (2.5 kPa) for dynamic closure in emergency fire situations. This damper may be installed vertically (with blades running horizontal) or horizontally and is rated for airflow in either direction.

### Ratings

#### UL 555 Fire Resistance Rating

Fire Rating: 1½ hours

Dynamic Closure Rating: Actual ratings are size dependent

Velocity: Up to 4000 fpm (20.3 m/s)

Pressure: Up to 10 in. wg (2.5 kPa)

UL 555 Classification R13317

Model SEDFD-210 meets the requirements for fire dampers established by:

**National Fire Protection Association**  
NFPA Standards 80, 90A, & 101

**IBC International Building Codes**

**CSFM California State Fire Marshal**  
Fire Damper Listing (#3225-0981:103)

Greenheck Fan Corporation certifies that the model SEDFD-210 shown herein is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Programs. The AMCA Certified Ratings Seal applies to air performance ratings only.

## Sleeve and Sideplate Dimensions

The drawings below and corresponding table show the position of the SEDFD-210 damper when mounted in a factory sleeve. The standard mounting locations provide enough space for the mounting of manual quadrant, controls and allow space for installation of retaining angles and duct connections.

The "A" dimension is the location of the damper mounted in a factory sleeve. The table below shows the Standard and Maximum "A" dimensions.

in. (mm)	"A" Dimension		
	Sleeve Std	Sleeve Max	Sideplate
All Dampers (RRL)	7 3/16 in. (183)	16 (406)	6 3/16 (157)
When Height is 11 in. (279) or less with RRL, RRL/OCI, or TOR	12 (305)	16 (406)	12 (305)

**NOTE:** Entire damper frame is not required to be installed within the wall. The damper blades, when closed should be contained within the wall.

All dimensions shown are in inches.

## Transitioned Damper Dimensions

When a combination fire smoke damper is being used in conjunction with round and oval ductwork, the SEFSD-211 can be supplied in a factory sleeve with round or oval transitions on both ends of the sleeve. Dampers should be ordered to the duct dimensions.

\* These dimensions are furnished approximately 1/4 in. (6mm) undersize, except round and oval dimensions which are approximately 1/8 in. (3mm) undersize.

## Multiple Section Dampers

Dampers larger than maximum single section size are supplied as a factory assembly of two or more sections of equal size. The following figures show maximum damper section size and assembly configurations for multi-section dampers.
