AMCA LICENSED AIR PERFORMANCE DATA

Ruskin Company certifies that the FSD60M shown hereon is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to air performance for the FSD60M.

To determine the AMCA Licensed air performance:
Locate the applicable feet per minute face velocity on the bottom of the velocity vs. pressure drop chart below. Move up the chart to the most appropriate size damper line. From the intersection point, move left to determine the pressure drop on the left side of the chart.
For other damper sizes refer to **Air Performance Data For All Fire and Smoke Dampers** spec sheet.

SPACE ENVELOPE

Externally mounted actuators require space outside the damper sleeve. The "S" dimension is the "side" clearance, the "T" dimension is the "top" clearance and the "B" dimension is the "bottom" clearance required for the various actuators approved for use with Ruskin fire/smoke dampers. Actuators and accessories are factory mounted on the right side when viewed from the actuator side of the wall or floor. Ruskin fire/smoke dampers can be rotated or turned over to accommodate the application.

ACTUATORS	H (Damper Height)	S	T	B
FSAFB24-SR	17" (432)	5" (127)	0" (0)	N/A

NOTES:

- The "H" dimension represents the required height to encompass the actuator/enclosure and accessories with nothing protruding above or below the damper.

FSD60M SLEEVE DIMENSIONAL DATA

The 'L' dimension is the distance from the end of the sleeve to the damper. The standard damper location in the sleeve provides enough space for the actuator, controls, mounting angles and duct connection. The standard sleeve length for FSD's is 20" (508) long and the standard 'L' dimension is 10⁵/₈" (270). The standard 'L' dimension allows the end of the sleeve to be a minimum of 10⁵/₈" (270) to the wall/floor and up to a maximum of 12¹/₂" (318) to the wall/floor.

*The EFL, PFL, SP100 or TS150 location may be located above, below or on the side of the actuator depending upon the dampers height.

Optional 17" (432) long sleeve length available. Due to space limitations for actuators and controls with 17" (432) long sleeves, the damper height ('B' dimension) is restricted to the dimensions shown on the chart below. Consult Ruskin for other sleeve lengths.
