## **DIRECT DRIVE VANE AXIAL FAN**

## Feature

For commercial and industrial application where large volume of air is required at moderate to high pressure. Volume coefficient ranged from 0.3 to 0.6 and pressure coefficient ranged from 0.2 to 0.6. Specially designed integral straightening vanes reduce turbulence and provide high efficiency and low sound level.

## Construction

Double flanged casing is produced in mild steel or galvanized steel. The impeller blades are made of Aluminum Alloy.

## Finish

Zinc rich primer and polyester powder coating or galvanized finishing are available for all mild steel parts.

## Operating Temperature

Normal Ventilation : -20°C to +55°C

High Temperature Application : available up to 400°C/2Hrs.

## Motors

Totally Enclosed Class 'F' or 'H', with a min. IP55 protection are fitted as standard. Motors 3.0kW and above are star/delta starting. Motor of other specification are available upon request.

## Airflow Direction

Air flow from impeller to motor is fitted as standard. Air flow from motor to impeller can be supplied upon request.

Kruger Ventilation Industries Asia Co., Ltd certifies that the **TDD series** shown herein is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.
