# UTILITY FAN

UF Series

## OVERVIEW

Twin City line of utility ventilating sets is one of the most comprehensive in the industry. Utility sets are an excellent choice for general exhaust and supply requirements of commercial and light industrial applications. They are suitable for indoor usage and outdoor usage, with the addition of a weather cover to enclose the motor and drives. The fan housings are lock seam steel construction.

## TYPICAL APPLICATIONS INCLUDE

Data Center Exhaust, General HVAC, Elevator Shaft Exhaust/Pressurization, Restroom Exhaust, Stairwell Pressurization, Industrial Ovens, Vehicle Exhaust generator Room Ventilation, Swimming Pool Exhaust, Kitchen Exhaust, Dishwasher Exhaust, Elevator Shaft Exhaust/Pressurization, Emergency Smoke Exhaust, Stairwell Pressurization.

## CONFIGURATIONS

The fan housings are rotatable to the seven standard discharge positions. Both clockwise and counter-clockwise rotations are available, Direct Drive and Belt Driven Configurations

### ➤ UFxxD (Direct Drive)

Available in 8 sizes, 12.0" to 24.0" wheel diameters

### ➤ UFxxB (Belt Driven)

Available in 10 sizes, 12.0" to 36.0" wheel diameters

## OPTIONAL CONSTRUCTION

High Temperature, Special Materials, Special Coatings, IEC-ex Spark Resistant

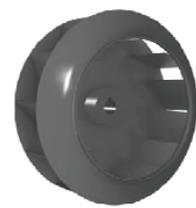

## WHEEL TYPES

Backward Inclined/Curved Centrifugal, Spark resistant aluminum wheels, Steel wheel (Heat & Smoke removal)

Aluminum Wheel

Steel Wheel

## EASY MAINTENANCE ACCESS

By removing the fasteners, the weather cover lifts off for complete access to all the drive components.

## KITCHEN EXHAUST

UF packages include V-belt drives, motor, weather cover, bolted access door, drain connection, back plate fins,

## CERTIFICATIONS

AMCA Sound and Air Performance, IEC, CE for Electrical and RoHS

Twin City Fan & Blower certifies that the Models UF12B, UF16B, UF18B, UF20B, UF24B, UF30B & UF36B shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program. CE Conformity with Low Voltage Directive 2014/35/EU relating to electrical equipment designed for use within certain voltage limits

CE Conformity with Low Voltage Directive 2014/35/EU relating to electrical equipment designed for use within certain voltage limits

Restriction of Hazardous Substances in Electrical and Electronic Equipment

# GENERAL INFORMATION

## SWB SERIES CENTRIFUGAL FAN

### SPARK-RESISTANT CONSTRUCTION

AMCA "C", AMCA "B" and AMCA "A" are available as an option

Type	Construction
<b>A</b>	All parts in contact with the airstream are constructed of non-ferrous material
<b>B</b>	The fan wheel is constructed of a non-ferrous material. A non-ferrous rub ring surrounds the fan shaft where it passes through the fan housing.
<b>C</b>	The Wheel or the inlet cone is constructed of non-ferrous material. A non-ferrous rub ring surrounds the fan shaft where it passes through the fan housing.

Notes:

- A) Bearings shall be placed outside the airstream.
- B) The user shall electrically ground all fan parts.
- C) The use of the above standard in no way implies a guarantee of safety for any level of spark resistance. "Spark resistant construction also does not protect against ignition of explosive gases caused by catastrophic failure or from any airstream material that may be present in the system."

### HIGH TEMPERATURE CONSTRUCTION

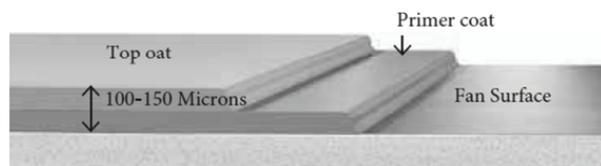

Temp. Range	Construction
<b>20°F – 200°F</b>	Standard construction
<b>200°F – 300°F</b>	RPM limited to 95% of maximum
<b>300°F – 500°F</b>	Steel wheel construction with fins RPM limited to 90% of maximum.
<b>500°F – 750°F (Two Hours)</b>	Steel wheel construction with fins RPM limited to 90% of maximum. Shaft Cooler High Temp Grease Bearings Shaft Seal

### PROTECTIVE COATINGS

Twin City offers a wide variety of protective coatings suitable for corrosive applications. All coatings are electro statically applied baked powders that offer a durable long lasting finish.

### STD RALL – 9035, 9016, 9010

Two-Coat system is available as an option

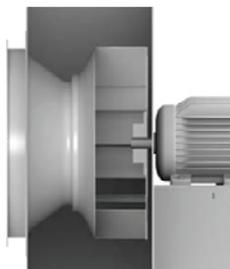

### MOTOR SELECTION

Both direct drive and belt drive models are available with a wide range of voltages and enclosures. Standard belt drive TEFC selected using a conservative portion of the IEC/NEMA service factor. Standard direct drive TEFC motors have Class B/F insulation and internal thermal overload protection. Each size is carefully engineered to match the motor to the wheel capacity.

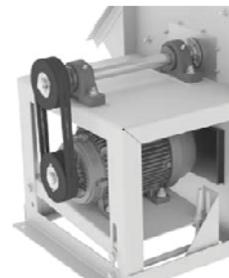

### ARRANGEMENT 4 OR 10

Fans are constructed with the motor and bearings (if apply) out of the mainstream. For arrangement 10, motors are mounted inside of the pedestal on an adjustable motor plate. For arrangement 4, motors are mounted on top of a pedestal. Both arrangements allow for the use of a weather cover and can be used in ducted or non-ducted applications.

Arrangement 4

Arrangement 10

## HOUSINGS

Utility blowers are manufactured to insure a long, corrosion resistant life. The Finishing resists rust and will help maintain the unit's integrity even in environments such as coastal regions.

The housings use a mechanically fastened seam. This airtight and watertight housing construction uses the same structural support as all welded housings.

Optional on larger fan sizes, centrifugal fans are manufactured with heavy gauge, welded housing construction.

## THE HEAVY DUTY SUPPORT FRAME

The heavy duty support frame provides a strong structural foundation for the motor and drive assembly, as well as rigid reinforcement for housing members.

## INLET CONE

Deep spun cone, aerodynamically designed for smooth air entry into the wheel.

## MOTOR/BEARING PEDESTAL

Large open motor compartment allows complete access to motor and motor base for quick and easy servicing and belt tension adjustment.

## DRIVE

Adjustable or fixed pitch, 1.5 service factor V-belt drives with cast iron sheaves, and V-belts designed to be oil and heat resistant, and to dissipate static electricity.

## BEARINGS

Heavy duty grease lubricated pillow block bearings selected for minimum average life (AFBMA L-50) of at least 200,000 hours at maximum class speed.

## SHAFT

AISI 1045, turned ground and polished for accuracy. Designed to provide first critical speed of at least 1.25 times the maximum class speed

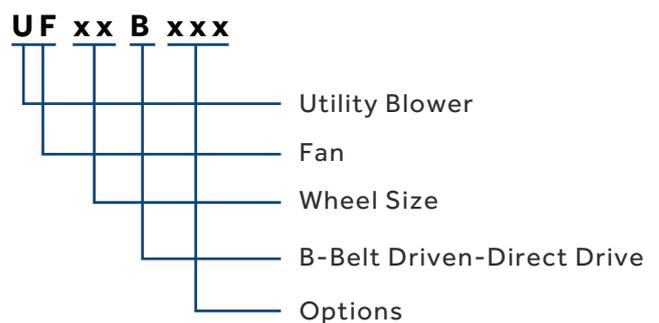

## OUTLET FLANGE

Standard on all sizes

## VIBRATION ISOLATION

Twin City offers a complete package of vibration isolators, isolation bases and inertia bases to simplify field assembly and reduce transmitted vibrations..

## ORDER CODE

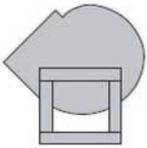

# ROTATION & DISCHARGES

UF- UTILITY FAN SERIES

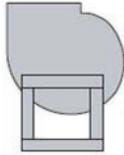

## ► DISCHARGE POSITIONS AND ROTATABLE HOUSINGS

Rotation and discharge is always determined from the drive side of the fan.

### Gravity Damper

Flange mounted damper is available for exhaust or supply applications.

### Inlet & Outlet Screen

Screens are available for mounting in the fan inlet or outlet.

### Bolted Access Door

Bolted access door allows for inspection and maintenance of internal fan components

### Drain

Drains are made of 1-2" pipe which is mechanically fastened and sealed to prevent leakage at the lowest point of the scroll

### Extended Lube Line

Extended Lube Lines Allow for easy lubrication of bearings on belt driven units without disassembly

### Vibration Isolation Spring

Spring type vibration isolation mounts are available to reduce the transmission of fan vibration in 1" or 2" deflection

### Quick Open Access Doors

Access doors are specified where examination and cleaning of the fan interior is required.

### Inlet Flange Inlet and outlet flanges

Inlet Flange Inlet and outlet flanges with prepunched mounting holes are available on all sizes to provide a bolted connection to ductwork.

### Stainless Steel Hardware

Stainless steel hardware is available for selection.

### Shaft Seal

A felt, ceramic fabric shaft seal with a rub rings available for operation at high temperatures or for exhausting contaminated air.

### Heat Slinger

The heat slinger is an aluminum cooling disc mounted on the fan shaft between the inboard bearing and the blower housing to dissipate heat conducted along the fan shaft

### NEMA 3R Disconnect Switch

NEMA 3R rain-tight disconnect switch, externally mounted and is shipped loose for field mounting and wiring or factory mounted and wired

### NEMA 4 Disconnect Switch

NEMA 4 disconnect switch (optional) is mounted externally and is water- and dust-tight. Switch is available shipped loose for field mounting and wiring or factory mounted and wired.

### NEMA 7/9 Disconnect Switch

NEMA 7/9 disconnect switches are provided on fan with explosion proof motors. NEMA 7/9 disconnects will be shipped loose for field mounting and wiring

Performance shown is for installation Type B: Free Inlet, Ducted Outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0' (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type B: free inlet hemispherical sones levels. Performance ratings do not include the effects of appurtenances in the airstream.

Performance shown is for installation Type B: Free Inlet, Ducted Outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type B: free inlet hemispherical sones levels. Performance ratings do not include the effects of appurtenances in the airstream.

Performance shown is for installation Type B: Free Inlet, Ducted Outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0' (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type B: free inlet hemispherical sones levels. Performance ratings do not include the effects of appurtenances in the airstream.

Performance shown is for installation Type B: Free Inlet, Ducted Outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0' (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type B: free inlet hemispherical sones levels. Performance ratings do not include the effects of appurtenances in the airstream.

Performance shown is for installation Type B: Free Inlet, Ducted Outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type B: free inlet hemispherical sones levels. Performance ratings do not include the effects of appurtenances in the airstream.

Performance shown is for installation Type B: Free Inlet, Ducted Outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sonas at 5'0" (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type B: free inlet hemispherical sonas levels. Performance ratings do not include the effects of appurtenances in the airstream.

Performance shown is for installation Type B: Free Inlet, Ducted Outlet. Power rating (BHP) does not include transmission losses. The sound ratings shown are for loudness values in fan sones at 5'0" (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type B: free inlet hemispherical sones levels. Performance ratings do not include the effects of appurtenances in the airstream.

## TYPICAL SPECIFICATION

Model UF Backward Inclined, as manufactured by Twin City.

## PERFORMANCE

Fans shall be tested in accordance with AMCA 211 and AMCA 311 test codes for air moving devices and shall be guaranteed by the manufacturer to deliver rated published performance levels. UF fans shall be licensed to bear the AMCA certified ratings seal for both sound and air.

## HOUSING

Fan housings shall be heavy gauge with fastened seam and partially welded construction. Housings shall be suitably braced to prevent vibration or pulsation. Housings shall have tapered spun, aerodynamically designed inlet cones or shrouds providing stable flow and high rigidity. Housings shall be of the rotatable design, convertible to seven standard discharge configurations.

## WHEELS

UF backward inclined wheels shall be single thickness plate type designed for maximum efficiency and quiet operation and shall be of the nonoverloading type. Sizes 10 through 36 shall be constructed of aluminum, with blades welded to the spun wheel cone and back plate.

## SHAFT

Shafts shall be AISI 1045 hot rolled steel, accurately turned, ground, polished, and ring gauged for accuracy. Shafts shall be sized for the first critical speed of at least 1.25 times the maximum speed.

## BEARINGS

Bearings shall be heavy duty, grease lubricated, anti-friction ball, self-aligning, pillow block type and selected for a minimum average bearing life (AFBMA L-50) in excess of 200,000 hours at the maximum fan RPM.

## DRIVE

Motor sheaves shall be cast iron, and supplied as either variable pitch or fixed pitch. Drives and belts shall be rated for a minimum of 150% of the required motor HP.

## ACCESSORIES

when specified, accessories such as access doors, variable inlet vanes, outlet shutters, inlet screens, etc., shall be provided by Twin City maintain one source responsibility.

## FACTORY RUN TEST

All fans prior to shipment shall be completely assembled and test run as a unit at operating speed or maximum RPM allowed for the particular construction type. Each wheel shall be statically and dynamically balanced in accordance with ISO1940 "Balance Quality and Vibration Levels for Fans" to Fan Application, Balance Quality Grade G2.5. Balance readings shall be taken by electronic type equipment in the axial, vertical, and horizontal directions on each of the bearings. Records shall be maintained and a written copy shall be available upon request.

## WARANTEE

The manufacturer shall guarantee the workmanship and materials for its UF Utility Sets for at least one (1) year from startup or eighteen (18) months from shipment, whichever occurs first.
