

High Efficiency Mixed Flow Fan **YFIMF**

INFINAIR ARABIA COMPANY LTD BRANCH. certifies that the Mixed Flow Fans (YFIMF) shown herein is licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program

INFINAIR™
INFINAIR ARABIA CO. LTD.

ABOUT US:

INFINAIR ARABIA is one of the pioneer fans & manufacturing company in MENA. It is a partner to INFINAIR Corporation, which was established in 2003. In the last two decades, INFINAIR Corporation has expanded worldwide. In 2018, INFINAIR was established a production factory in the Kingdom of Jordan, Amman – Mowaqqar Industrial City, and in 2020, INFINAIR had expanded a new factory in Saudi Arabia. INFINAIR ARABIA focuses on Quality Management to develop the system, processes, and work professionalism. INFINAIR is a certified company by ISO9001, ISO14001, and ISO45001. INFINAIR ARABIA has invested in Research & Development to certify the products by AMCA, UL, ETL, SMOKE, and RoHS. Today, INFINAIR ARABIA supplies to all Middle East & North Africa Countries and participates in MENA projects.

INFINAIR ARABIA achieved SAUDI MADE Authorization & Accreditation Mark. It is contributing to Saudi Made local contents and fulfills the 2030 vision. INFINAIR ARABIA is very active in the Saudi Market and supports many projects.

INFINAIR ARABIA supplies to many factories, hospitals, universities, malls, towers, oil & gas plants, water desalination, and several others.

PRODUCTION AND FABRICATIONS

INFINAIR™
شركة إنفينير العربية
INFINAIR ARABIA CO. LTD.

ACCESSORIES

INFINAIR ARABIA supplies many options along with the fan to help the customers select the best optimization and homogeneity. There are Electrical, Mechanical and Controller accessories like:

- * Control Panels
- * Electric Parts
- * Duct Accessories
- * Vibration Isolators
- * Acoustic Media

The options will support easier operation, less time consuming for our clients to search the availability and granting the quality.

>> Model Number Code

>> “Wind Hunter” series Mixed Flow Impeller

Brand New Impeller Design

The inlet bell and the shroud cover are precisely connected, minimizing the back flow and leakage caused by pressure difference.

Advanced Design

Unique airflow characteristics. Our engineers have repeatedly optimized the wheel with countless CFD simulations.

Advanced Fabrication

The wheel and other fixtures are made from a special designed mold and are continuously welded. Ensuring maximum strength is maintained.

High Balancing Level

The balancing level of the wheel is up to G2.5 (AMCA 204) which is much higher than the standard G6.3 required internationally. Stability is greatly increased thus lowering the vibrations and noise.

Lowest Noise Level

The YFIMF has the lowest noise level over the axial and the centrifugal fan.

>> Product Characteristics

Performance Characteristics

The mixed flow fan has larger air volume over the centrifugal fan and higher air pressure over the axial fan. When placing them under the same working conditions, the mixed flow fan has more advantages over the others in terms of performance and noise level.

High Efficiency

The design of the wheel and guide vane has been repeatedly optimized to assure high efficiency, leakage free and low turbulence. The models IMF shown herein are licensed to bear the AMCA seal and rating

Better Sound Proofing

The noise of the mixed flow fan is determined by its structural design and changes in acoustical power (see fig. below). The noise generated in each air volume segment is much lower than the axial and centrifugal fan with low acoustical level (62.5-250Hz).

Performance certified: Is for installation Type B - free inlet, ducted outlet. Power rating (kW) does not include transmission losses. Performance ratings do not include the effects of apertures (accessories). Values shown are for inlet LWA sound power levels for installation Type B: Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻³ watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dB(A) A-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dB(A) levels are not licensed by AMCA International.

Performance certified: Is for installation Type B - free inlet, ducted outlet. Power rating (KW) does not include transmission losses. Performance ratings do not include the effects of apertures (accessories). Values shown are for inlet LWA sound power levels for installation Type B: Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dB(A) A-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dB(A) levels are not licensed by AMCA International.

Performance certified: Is for installation Type B - free inlet, ducted outlet. Power rating (kW) does not include transmission losses. Performance ratings do not include the effects of apertures (accessories). Values shown are for inlet LWA sound power levels for installation Type B. Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dB(A) A-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dB(A) levels are not licensed by AMCA International.

Performance certified is for installation Type B - free inlet, ducted outlet. Power rating (KW) does not include transmission losses. Performance ratings do not include the effects of obstructions (accessories). Values shown are for inlet LWA sound power levels for installation Type B. Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dB(A) A-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dB(A) levels are not licensed by AMCA International.

Performance certified is for installation Type B - free inlet, ducted outlet. Power rating (kW) does not include transmission losses. Performance ratings do not include the effects of apertures (accessories). Values shown are for inlet LWA sound power levels for installation Type B. Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻³ watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dB(A) A-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dB(A) levels are not licensed by AMCA International.

Performance certified: Is for installation: Type B - free inlet, ducted outlet. Power rating (kW) does not include transmission losses. Performance ratings do not include the effects of apertures (accessories). Values shown are for inlet LWA sound power levels for installation: Type B - Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻³ watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA(A)-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dBA(A) levels are not licensed by AMCA International.

Performance certified: Is for installation: Type B - free inlet, ducted outlet. Power rating (kW) does not include transmission losses. Performance ratings do not include the effects of apertures (accessories). Values shown are for inlet LWA sound power levels for installation: Type B: Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻³ watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dBA(A)-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dBA(A) levels are not licensed by AMCA International.

Performance certified. Is for installation. Type B - free inlet, ducted outlet. Power rating (kW) does not include transmission losses. Performance ratings do not include the effects of apertures (accessories). Values shown are for inlet, LWA sound power levels for installation. Type B. Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dB(A) A-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dB(A) levels are not licensed by AMCA International.

Performance certified: Is for installation Type B - free inlet, ducted outlet. Power rating (kW) does not include transmission losses. Performance ratings do not include the effects of apertures (accessories). Values shown are for inlet LWA sound power levels for installation Type B. Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. dB(A) A-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5 m. Note that dB(A) levels are not licensed by AMCA International.

Values shown are for inlets with sound power levels for Installation Type B: Free inlet, ducted outlet. The sound power level ratings shown are in decibels, referred to as 10⁻¹² watts, calculated per AMCA International Standard 301. The A-weighted sound ratings shown have been calculated per AMCA International Standard 301. (dB(A) A-weighted sound pressure level is based on 11.5 dB sound attenuation per octave band at 1.5m. Note that dB(A) levels are not licensed by AMCA International.
