### MODEL OVERVIEW

S&P's Model CM is available in a full range of sizes (10 through 36) provides airflow performance from 500 CFM to over 24,500 CFM with static pressure up to 5.5 in. w.g. This single inlet backward inclined utility fan provides substantial benefits for pressure flow, low power consumption and low noise level, ideal for commercial and industrial applications. Typical applications include either supply or exhaust service for ducted systems in schools, theaters, gymnasiums, manufacturing plants, hotels, office buildings, restaurant hoods, and many other general ventilation applications.

The turbine performance, minimizes unnecessary energy losses resulting in a system with high efficiency.

Its design, manufacture and testing guarantee a long operating life with low maintenance. Also having great versatility in arrangements, and available positions with a complete series of mounting accessories for installation and proper operation of equipment for each application.

The mechanical design and construction determines the maximum operating speed and power. The performance ranges shown on the following pages comply with the Class I operating limits as defined in AMCA standard 99.

Models CM & CMRHUL are available in our Quickship program. Many of the sizes are available for 3 day or 10-day shipping from stock.

**UL705 units have a 5 year fan housing warranty, CM-RHUL units have a 2 year fan housing warranty and CM-HT units have a 1 year fan housing warranty. 1 year motor warranty.**

All specifications are subject to change without notice unless approved in submittal by S&P USA.

## **STANDARD CONSTRUCTION FEATURES**

**Inlet/L-Flange (Standard):** This standard feature allows for easy duct attachment. The inlet collar allows the fan to be removed with minimal disconnecting of the duct work.

**Weather cover (Standard):** Sheet metal ventilated enclosure for the motor, shaft, belts and drives for safety and weather protection.

**Access door (Standard):** This standard feature is a bolted access door that allows inspection or cleaning of the wheel compartment.

**Threaded Drain Fitting (Standard):** This standard feature is a 3/4" I.P.S. coupling positioned at the lowest point in fan housing to drain moisture from the bottom of the fan housing.

**Integral Mounting Flanges (Standard):** Integral flanges for easy roof mounting of all units.

**cULus705 (Standard on CM Units):** For electrical reliability. Includes standard construction features listed above and cULus705 label. Clockwise or counter clockwise top horizontal (CW-TH or CCW-TH) discharge configuration are standard but other positions are available (must specify discharge orientation on order).

**cULus762 (Standard on CM-RHUL units):** For use in grease laden air or temperatures up to 400 degrees F. Ships with standard construction features listed above and cULus762 label. Clockwise or counter clockwise upblast (CW-UB or CCW-UB) discharge configuration are standard but top angular up (CW-TAU and CCW-TAU) positions are also available (must specify discharge orientation on order).

**cULus793 (Standard on CM-HT units):** Listed for emergency heat and smoke removal. Designed and UL Listed to withstand inlet temperatures of 500°F for 4 hours and 1000°F for 45 minutes. With this option the fan ships with standard construction features listed above, heat slinger, and cULus793 label. Clockwise or counter clockwise upblast (CW-UB or CCW-UB) discharge configuration are standard but other positions are also available (must specify discharge orientation on order).

## **ACCESSORIES/OPTIONS**

**Inlet/outlet Guard (Option):** Heavy-gauge wire protects people and the fan entrance from unwanted debris in nonducted installations. Outlet Guard comes with outlet flange. (Not for UL762 use).

**Outlet Flange (Option):** Required on the discharge for mounting of either the optional damper or the optional outlet screen.

**U-flange inlet (Option):** Available for easy connection to flanged ductwork.

**Discharge damper (Option):** Heavy-duty interconnecting blade design opens by velocity. It helps prevent the entry of unwanted objects. Outlet Flange is required (included with damper). Maximum temperature is 200 degrees F and maximum face velocity is 3500 FPM. (Not for UL762 use). Damper cannot be used with TAD, DB, & BAD positions.

**RIS Vibration Pads (Option):** Set of RIS (rubber in shear) or spring type isolators help reduce vibration, improve motion restraint, help provide proper leveling, reduce torque forces, and provide improved stability in the fan installation.

**Spring Vibration Pads (Option):** Set of spring pads, ship loose for field mounting.

**Grease trough (Option):** Allows grease to collect in an easy to service container keeping roof area clean. Design allows for water and grease separation.

**Shaft seal (Option):** Nonasbestos fibrous material is sandwiched between the fan housing and cover plate. It helps reduce heat and the transfer of air from the wheel compartment. Seal does not make the fan air or gas tight.

**Disconnect (Option):** Available in either open or rain tight enclosure and matches the motor electrical characteristics. Allows for fan electrical cut off for servicing or inspection safety. (Ships loose).

**Heat Slinger (Option):** An aluminum cooling disc mounted on the fan shaft between the inboard bearing and the fan housing. The disc dissipates heat conducted along the fan shaft, and it also promotes circulation in the motor compartment. The additional circulation in the motor compartment extends motor life, because it allows the motor to operate at lower temperatures. Heat Slinger comes standard when ordering cULus793 listing.

## **CONSTRUCTION/SPECIFICATION CHECKLIST**

**Type:** UTILITY VENT SET

**Type of Wheel:** Backward Inclined

**Rotation:** CW and CCW

**Sizes:** 10, 12, 14, 16, 18, 20, 22, 24, 27, 30, 36

### **Construction**

#### **Housing & Drive Frame Structure**

The unit is solidly built, housing joints are welded intervals (*continuous welding on request, contact factory for availability and delivery schedules*), this provides greater strength, accuracy on the boards and makes a robust unit, which is an added value.

#### **Wheel**

Backward inclined centrifugal wheel is constructed of steel blades protected with a polyester powder coat finish. All wheels are statically and dynamically balanced to ISO 1940 and AMCA 204-G2.5 standards.

#### **Paint**

The unit is subjected to a coil coating process, where the steel is treated chemically to ensure the adherence of the polyester paint. Subsequently, powder coating is bonded to the parts through an electrostatic process, where after baking the piece takes on its highest characteristics corrosion resistance, with great adhesion properties and impact resistance.

#### **Shafts and Bearings**

Turned, ground and polished allow steel shafts sized so the first critical speed is at least 30% over the maximum operating speed. Standard bearings are heavy-duty, self-aligning pillow block ball bearings with minimum L10 life in excess of 100,000 hours at maximum cataloged operating conditions.

#### **Motors**

Heavy-duty ball bearing motors are factory mounted on an adjustable base for ease of service and belt maintenance. Standard motor enclosures are available as Open Drip Proof (ODP), Totally Enclosed Fan Cooled (TEFC). Explosion Proof motors are available by special request.

#### **Drives**

V-belt drives are selected for a minimum safety factor of 150% of the driven horsepower. Cast iron motor pulleys are adjustable for final system balancing and are factory set to the required RPM range. Dual groove v-belt drives are standard for motors 5 HP thru 10 HP. Three groove v-belt drives are standard on 15 HP units.

#### **Temperature**

Standard operating temperature range for cULus 705 units is -20°F to 200°F. For fans with cULus 762 construction the range is -20°F to 400°F. For CM-HT models with cULus 793 listing for emergency heat and smoke removal, designed and UL Listed to withstand inlet temperatures of 500°F for 4 hours and 1000°F for 45 minutes.

#### **cULus 762 Fan Installation**

Model CM is available with the 762 grease listing from UL. The fan will operate with continuous airstream temperatures of 400°F. Per NFPA 96, the fan discharge must be at least 40 inches above the roof line and the duct must be of all welded construction with a minimum distance of 18 inches above the roof line.

The A-weighted sound ratings shown have been calculated per AMCA standard 301. Values shown are for inlet Lwi(A) sound power levels for installation type B - free inlet, ducted outlet. Ratings do not include the effect of duct end corrections. The sound ratings shown are loudness values in fan sones at 1.5 m (5 ft) in a hemispherical free field calculated per AMCA International Standard 301. Values shown are for: Installation type B: free inlet hemispherical sone levels.
