

Rectangular Sound Attenuators

Rectangular sound attenuators

SA 20

Advantages

- Efficient at medium and high frequencies.
- AMCA Certified performance for SA 20 - L900 & SA 20 - L1500
- Approved for installation in Fire Rated ductwork (2h) and Smoke Exhaust ductwork (400°C - 2h).

Aldes Middle East FZE certifies that Sound Attenuator SA20 - L900 and SA20 - L1500 shown herein is licensed to bear AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 1011 and comply with requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to Dynamic insertion loss, Airflow generated noise and Pressure drop.

APPLICATION

- Attenuation of fan / AHU noises propagated through air ducting.
- Highly effective at medium and high frequencies.
- Air exhaust and air supply.

DESCRIPTION

- Aldes sound attenuator assemblies are approved for use in fire rated ductwork systems where a fire rating of up to 2h is specified in terms of stability and integrity criteria of BS 476: Part 24: 1987 for fire exposure from either inside the duct or outside the duct.
- Aldes sound attenuator assemblies are also approved for use in Smoke extract ductwork systems carrying smoke & hot gases up to 400°C for durations up to 2h.

CONSTRUCTION

- Casings and baffles manufactured from galvanized sheets metal of 24 ga. thickness (standard) / 20 ga. thickness (fire rated) with lock formed seams which complies with DW 144 code. Casings have slide on flanges (35mm) as standard.
 - The baffle contains incombustible acoustic insulation having flame spread index less than 25 and smoke spread index less than 50. The insulation has a black glass tissue facing and is contained behind perforated sheet of 24 ga. thickness on both sides. This dual protection prevents damage and fibre erosion at high velocities.
 - Minimum size: W = 250mm; H = 300mm; L = 600mm
 - Maximum size: W = 2300mm; H = 2000mm; L = 2400mm
- Note: Larger sizes manufactured and supplied in multi-sections to be assembled at site.

INSTALLATION

- Install directly on a duct section.
- Horizontal / vertical installation.
- Indoor / outdoor.

AVAILABLE OPTIONS

- Other gauges of galvanized steel, SS (304), SS (316L) available upon request.
- Melinex is an impervious thin membrane used to enclose sound absorbent material where clinical conditions are required. This is generally required for the hospitals, clinics, food factories and applications where humidifiers are used.
- Melinex film on both sides reducing contamination risk, code P.
